

V-17 Gel No. 1 for Wood

Manufactured by Coating Development Group, Inc.

- **EASY TO USE CLEAR PROTECTIVE FINISH**
- **NO BRUSHING**
- **WATER & ALCOHOL RESISTANT**
- **FAST DRYING**
- **LEAD FREE**

RECOMMENDED:

For unfinished, new wood surfaces and previously finished wood surfaces that have been stripped and sanded to bare wood. Specially formulated, fast drying, clear synthetic oils designed to enhance the natural beauty of all types of woods, and offer excellent clarity and outstanding moisture and alcohol resistance.

DIRECTIONS FOR USE:

Here is a simple foolproof method for applying **Gel No. 1** for wood without runs, sags, etc. to obtain a professional finish on all woods.

- **SURFACE PREPARATION** - On new wood surfaces be sure wood is clean, dry, and well-sanded. Old wood surfaces must be cleaned down to bare wood and free of wax and dust.
- **APPLICATION** - Apply finish with soft rag or paper towel, rubbing into pores of the wood spreading it evenly with a circular motion. Allow the finish to set for 2-3 minutes, then wipe dry with soft rag or paper towel, using straight brisk strokes with the grain. If more finish protection is desired, apply additional coats using straight strokes with the grain.

DRYING TIME:

Air dry at least four hours between coats, depending on humidity and temperature conditions. For best results, allow overnight drying time between coats.

*Note: When using **Gel No. 1** for wood, follow the above procedure to achieve a clean, transparent, satin, patina finish. For a Smoother feel, apply a paste wax with fine (000) steel wool.*

CLEAN UP:

Use mineral spirits or paint thinner. Promptly discard all used rags in a water filled container. Close after each use. Disposal should be in accordance with local, state and national regulations.

CAUTIONS:

COMBUSTIBLE contains petroleum distillate. Keep away from heat or open flame. Avoid prolonged and repeated contact with skin. Do not get in eyes. Use only in a well ventilated area. **Keep out of reach of children.**

FIRST AID:

If swallowed, DO NOT induce vomiting. Call physician immediately. For skin contact, wash with soap and water immediately. In case of eye contact, flush eyes with plenty of water for at least 15 minutes.

NOTICE:

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.
